Education

Sant Gadge Baba Amravati University **Aug 2018 – Aug 2021**

Bachelor of Engineering in Electrical Engineering, CGPA: 9.5

Experience

Senior Software Engineer: Capgemini Technology, Mumbai **May 2022 - Present**

- Software Engineer with 3+ years of experience in full-stack development, specializing in building scalable web applications using Java, Spring Boot, and PostgreSQL. Proven track record in optimizing application performance and reducing processing times through efficient architecture and code optimization.
- Developed a robust full-stack web application using Angular, Spring Boot, and PostgreSQL to manage large customer databases, improving efficiency and reducing data processing time by 40%.
- Integrated RESTful APIs in Java, enabling smooth communication between the front-end (Angular) and the back-end (Spring Boot), leading to 30% faster response times.
- Collaborated on developing reusable UI components using Angular, which reduced development time for new features by 25%.
- Built a secure and responsive front-end using HTML5, CSS, and JavaScript, improving user experience across devices, with 20% better page load times.
- Managed version control and collaborative workflows using Git and GitHub, implementing branching strategies that ensured smooth code integration and reduced conflicts during releases.
- Automated build and deployment processes using GitHub Actions, reducing deployment times by 40% and ensuring continuous integration and continuous delivery (CI/CD).
- Developed complex data models in PostgreSQL to support business analytics and reporting functions, improving the decision-making process by providing real-time insights.
- Implemented security best practices for web applications, including JWT for secure authentication and SSL certificates, ensuring 100% secure communication between the client and server.

Projects

Mentor Dashboard

- Developed a comprehensive web application using Java Spring Boot, ReactJS, and MongoDB to manage and analyze employee data. The dashboard provides insights into key metrics such as billable and non-billable hours, leave utilization, laptop return times, and office attendance. This solution was designed to meet organizational requirements, enhancing data visibility and decision-making for management.

Genx DevSecOps (UDTA)

- Contributed to the development of a web application using Java Spring Boot, Angular, and PostgreSQL to facilitate the migration of pipelines like Bamboo plans to GitHub Actions.
- Focused on optimizing both the Java backend code and the UI code to enhance performance and maintainability. Streamlined CI/CD processes to improve automation and security in software development workflows.

Skills & Abilities

- Java
- Spring Boot
- PostgreSQL
- Microservices
- Angular
- React JS
- JavaScript
- HTML5
- CSS
- MongoDB
- GIT
- GitHub

Certifications

- **AWS Certified Cloud Practitioner**
- **Microsoft Azure Fundamentals (AZ-900)**
